Plastic micro wax, cosmetic base wax

Article number: D10028

General Information

Origin	Plastic microwax refers to a range of light-coloured microcrystalline waxes. These vary in consistency from soft-plastic to hard-dry. Plastic microwax is characterised by a predominantly branched molecular structure.
INCI	CERA MICROCRISTALLINA
Appearance	Whitish pastilles
Packaging	20 kg cartons and small packaging
Shelf life	36 months
Applications	Application in cosmetics and the pharmaceutical industry

Specification Values

Parameter	Value
Congeeing point	68 – 72 °C
Dropping point	74 – 78 °C
Penetration (25°C)	15 – 22 dmm
Acid number	-
Viscosity (100°C)	7 – 10 mPas
Density (20°C)	ca. 0,93 g/ml

Additional Information

All details are based on our current state of knowledge and are not transferable to other products. They do not constitute a warranty or guarantee of specific properties or suitability for particular applications. Each use of our supplied products must be tested in the respective application and checked for any existing property rights. Color and form of the product may slightly vary within a production batch due to the manufacturing process.
