## Rapeseed wax 5761 pastilles

Article number: D10070

### General Information

|              |                                                                                                                                                                                                                       |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Origin       | Rapeseed Wax 5761 Pastilles is a carefully adjusted mixture of hardened and partially hardened rapeseed oil, with a small proportion of high-melting other waxes. This product is free of paraffins from mineral oil. |
| CAS Number   | 84681-71-0; 8002-74-2; 67701-03-5                                                                                                                                                                                     |
| EC Number    | 283-532-8; 232-315-6; 266-928-5                                                                                                                                                                                       |
| Appearance   | Whitish to light yellow pastilles                                                                                                                                                                                     |
| Packaging    | 25 kg bags and small containers                                                                                                                                                                                       |
| Shelf life   | 24 months                                                                                                                                                                                                             |
| Applications | Industrial application, production of candles                                                                                                                                                                         |

### Specification Values

| Parameter             | Value              |
|-----------------------|--------------------|
| Congeeing Point point | 54 – 58 °C         |
| Drop point            | 57 – 61 °C         |
| Penetration (25°C)    | 20 0,1mm           |
| Acid value            | max. 16,5 mg KOH/g |
| Saponification number | 180 – 200 mg KOH/g |
| Density (20°C)        | ca. 0,90 g/ml      |

### Additional Information

All details are based on our current state of knowledge and are not transferable to other products. They do not constitute a warranty or guarantee of specific properties or suitability for particular applications. Each use of our supplied products must be tested in the respective application and checked for any existing property rights. Color and form of the product may slightly vary within a production batch due to the manufacturing process.
